Papers to Present

Below is a choice of papers to present during one of the two last lectures, on November 27, 2018 and December 4, 2018. The presentation should focus on methodology, and the identification strategy in each paper. Potential concerns about identification, and limits of the studies should also be emphasized. These papers are all very recent, at the working paper, revise and resubmit stage (some of them are now forthcoming). The idea is for you to also get an idea of what is required of a modern macroeconomics & finance paper.
